

# Professional Trash Bin Cleaning Equipment

Explore our lineup of **Trash Bin Cleaning Trailers** and **Pressure Washing Systems** — engineered for performance, reliability, and professional results. Choose between our **Single Cold** and **Double Hot** models below.

## Model: Single Cold

The **Single Cold Trash Bin Cleaning Trailer** is designed for new businesses and residential routes. It provides **up to 4,000 PSI cold-water cleaning power** with a **275-gallon clean water tank, filtration system, Smart Lift System, Electric Start, and 360° Rotating Cleaning Head**.

Single axle, compact, easy-to-operate design

Built for startups and small cleaning routes

Includes 275-gallon clean water tank with filtration

Smart Lift System and 360° Rotating Cleaning Head

## Model: Double Hot

The **Double Hot Trash Bin Cleaning Trailer** is engineered for professional and commercial use. Equipped with **dual hot and cold water systems** (up to 4,000 PSI), a **275-gallon clean water tank with filtration, Smart Lift System, Electric Start, and 360° Rotating Cleaning Head** for powerful and efficient cleaning.

- 11x6 heavy-duty trailer rated for 7,000 lbs
- Dual 4,000 PSI systems (Hot & Cold)
- Beckett oil burner for high-temp cleaning
- Includes 275-gallon tank and filtration system

## Single Cold Trash Bin Cleaning Trailer

Designed for startups and small cleaning businesses — the **Single Cold Trailer** delivers up to 4,000 PSI of cold-water cleaning power with a **275-gallon clean water tank** and filtration system, **Smart Lift System**, **Electric Start**, **Aluminum Tank**, and **360° Rotating Cleaning Head** for professional performance.

Built for Performance & Simplicity

The Single Cold Model  
is perfect for new bin  
cleaning  
entrepreneurs.

It combines **up to 4,000 PSI cold-water pressure** with smart engineering, low maintenance, and an easy-to-operate design.

## Key Features & Specifications

- Single axle, compact design
- Cold-water system **up to 4,000 PSI**
- **275-gallon clean water tank** with integrated filtration
- **360° Rotating Cleaning Head** for complete bin coverage
- **Smart Lift System** prevents strain during lifting
- **Aluminum Tank** for strength and durability
- Honda GX engine with **Electric Start**
- Ideal for residential and route-based cleaning

# Why Choose the Single Cold Model?

## 275-Gallon Clean Water Tank

Includes a filtration system for consistent water flow and professional cleaning results.

## Smart Lift System

Balances bin weight automatically, reducing operator effort.

## Aluminum Tank & Electric Start

Durable construction and reliable performance for daily routes.

---

## Compact, Efficient & Built to Last

The **Single Cold Trailer** offers unmatched value and simplicity for new operators. Equipped with a **Smart Lift System, Electric Start, 275-gallon clean water tank with filtration, Aluminum Tank**, and **360° Rotating Cleaning Head**, it's designed to make bin cleaning fast, easy, and highly profitable.

Its durable steel frame and lightweight aluminum tank ensure long-term reliability for residential and commercial bin cleaning routes.

# Trash Bin Cleaning Trailer

Engineered for professionals and high-volume operations, the **Double Hot Model** combines dual hot and cold water systems (up to 4,000 PSI) with a **275-gallon clean water tank and filtration system**, our **Smart Lift System, Electric Start**, and 360° Rotating Cleaning Head for unmatched cleaning performance.

Built for Power & Reliability

# The Double Hot Bin Cleaning Trailer delivers professional performance

with a dual **hot and cold water cleaning system** capable of reaching **up to 4,000 PSI**. Designed for **commercial routes** and heavy workloads with durability, strength, and total operator comfort.

# Premium Features & Specifications

- Dual axle, 11x6 heavy-duty trailer
- Rated for 7,000 lbs capacity with Electric Brakes
- Dual hot & cold water system **up to 4,000 PSI**
- Beckett oil burner for high-temp cleaning
- **275-gallon clean water tank** with integrated filtration
- **360° Rotating Cleaning Head** ensures total bin coverage
- **Smart Lift System** balances bin weight during lifting
- **Aluminum Tank** for durability and lightweight performance
- Honda GX engine with **Electric Start**
